

Sharepoint Online (Office 365) Implementation Guide

AUDIENCE:

Office 365 Sharepoint admins

Welcome to the easy steps to installing Recognize Sharepoint. This guide does not apply to Sharepoint 2010 and Sharepoint 2013 On-Premise implementations. **The Recognize Sharepoint app will work with both Classic and Modern Sharepoint experiences.** The screenshots below detail Modern Sharepoint experiences, however, the process is similar for Classic experience pages.

Scenarios

Two approaches to integrating Recognize with Sharepoint:

- OAuth based login (default)
- SAML SSO based login

We recommend SAML SSO because it will lead to a seamless experience with your users. They will automatically be logged in when they visit your intranet. In the OAuth based login case, users will be prompted with a login screen that will take them through an OAuth flow in a new window. Once complete, the page in Sharepoint will automatically refresh to show the desired logged in page. In both cases, if a user account does not yet exist at the time of login, one will be provisioned for them (also known as just-in-time provisioning).

App Installation

1. Install the Recognize Sharepoint app into a site collection by clicking the gear icon and select "Add an app".

2. Visit the Sharepoint store to install, search for Recognize, and click to install.

For your security, before we add your app, we need to confirm that you came from your organization or team SharePoint site. Click Continue to go back to your SharePoint site at https://planetosha.sharepoint.com/_layouts/15/SharePoint.aspx?Task=0710ef62c6c1&id=0710ef62c6c1 and finish installing the app. If you don't recognize this site, please go back to your organization's site and try to add the app again.

4. You should now see Recognize listed as an app in the site contents.

Page Installation

1. Now that the app is installed into your site collection, navigate to the page you want to install the Recognize Sharepoint app to and click "Edit" on that page:

2. Click "+" to add a web page, scroll down and select the "Recognize" app part.

3. This will load the default start page for Recognize. If you are logged out of Recognize in your browser, it will show a page to login. If you are logged in, it will default to the Recognize stream of recognitions. You may immediately log in by clicking "Sign in with Microsoft".

4. In the top left, there is a "pencil" icon, which will allow you to edit the Recognize Sharepoint app part. Clicking it will show a menu on the right of the settings.

SSO Configuration

SSO configuration simply involves changing the Base URL to your organizations SSO URL. Your SSO URL will have the form:

[HTTPS://RECOGNIZEAPP.COM/<YOURDOMAIN>/SAML/SSO](https://recognizeapp.com/<YOURDOMAIN>/SAML/SSO)

Tip: Simply login to recognizeapp.com, and visit the stream page. You will see the value you should use in the URL of that page.

Help / Troubleshooting

If you encounter any issues or have any questions installing the Recognize Sharepoint app, please contact us at support@recognizeapp.com.
